Abstract: The progress and results of the ongoing FP7-FISICA programme to re-asses the scientific goals of a Far-Infrared Space Interferometer and push the development of some of its key technology elements are reported. © OSA 2015. (11 refs)

Main heading: Spacecraft instruments

Controlled terms: Infrared detectors - Molecular physics - Spectroscopy

Uncontrolled terms: Cryogenic optics - Far infrared - FIRI - FISICA - SPECS - Spectral interferometry - SPIRIT

Classification Code: 655.1 Spacecraft, General - 741.3 Optical Devices and Systems - 931.3 Atomic and Molecular Physics
